

BSET

British Society of
Endovascular Therapy

BSET ANNUAL MEETING 2025

Thursday 26th-Friday 27th June • Tortworth Court Hotel, South Gloucestershire

REGISTRATION NOW OPEN!

KEYNOTE SPEAKERS

- **Anahita Dua**, *Vascular Surgeon at Massachusetts General Hospital and Associate Professor of Surgery at Harvard Medical School*
- **Andrew Holden**, *Director of Interventional Radiology at Auckland Regional Public Health Service, New Zealand*
- **Peter Schneider**, *Professor of Surgery in the Division of Vascular & Endovascular Surgery at University of California San Francisco*
- **Tara Mastracci**, *Complex Aortic Surgeon at Barts Heart Hospital, London*
- **Nick Cheshire**, *Professor of Vascular Surgery, Imperial College London*

HIGHLIGHTS OF THE PROGRAMME INCLUDE:

GUEST LECTURES:

- First in man technologies for vascular disease: What have we learnt from the past and what do we still need to learn?
- Cutting edge venous stenting and how to achieve success
- Management of lower limb arterial disease: Where does distal vein arterialisation and personalised anticoagulation fit in?
- When enough is enough: Defining the “no option” foot in the era of extreme limb salvage procedures
- What is an acceptable landing zone for aortic dissection – how do you make one in the acute situation?

DEBATES:

- Nothing has been left behind: Modern endovascular techniques in lower limb revascularisation are no better than stent and plain old balloon angioplasty
- End of the Rainbow: Further developments in endovascular aortic intervention will not be beneficial and open surgery will remain the only reliable and durable solution for areas not currently treated by EVAR
- No time to lyse: Treatment of chronic DVT is the only worthwhile intervention as there is no long-term benefit from treatment of acute DVT

Case discussion session • Training Symposium • The Presidents' Debate
Chee Soong Lecture

Rouleaux Club Symposium • Vascular Society session • Poster presentations
Abstract presentations, including Aortic and Peripheral prize sessions

A National Vascular Training Day will be held on Wednesday 25th June providing hands-on, interactive endovascular training for Vascular and IR trainees.

Numbers are limited to 24, and are available on a first-come, first-served basis.
