

Poster 1

Biomarkers of brain injury in endovascular procedures: A scoping systematic review

Stephen Crockett¹, Lydia Hanna¹, Richard Gibbs²

¹Imperial College London, London

²Imperial Vascular Unit, Imperial College Healthcare NHS Trust, London

Poster 2

Silent brain infarcts and neurocognitive injury after transcatheter aortic procedures: A systematic review

Stephen Crockett, Saud Khawaja, Lydia Hanna, Ghada Mikhail, Richard Gibbs

Imperial College London, London

Poster 3

A modified Knickerbocker technique for the endovascular treatment of subacute Type B aortic dissection (TBAD)

James McCaslin, Rana Khalil, John Reicher, Ralph Jackson, Rob Williams, Dominic Pang

Freeman Hospital, Newcastle

Poster 4

What vascular surgeons and Interventional radiologists can learn from a case of iatrogenic Type B aortic dissection following transradial coronary intervention in a patient with aberrant right subclavian artery (arteria lusoria): Case report and review of literature

Abdullah Thawabeh, Raimat Korede Salami

King's College Hospital, London

Poster 5

Aortic dissection global epidemiology

Edward Antram^{1,2}, Barnaby Farquharson^{1,2}, James Budge^{1,2}, Bilal Azhar^{1,2}, Peter Holt^{1,2}, Alicja Rudnicka³, Christopher Owen³, Iain Roy^{1,2}

¹St George's Vascular Institute, St George's University Hospitals NHS Foundation Trust, London

²Cardiovascular and Genomics Research Institute, St George's University of London, London

³The Population Health Research Institute, St George's University of London, London

Poster 6

Identifying anatomical risk factors for the development of 'non-dissecting' acute aortic syndrome

Will Selway¹, James Budge¹, Dan Carradice², Raghuram Lakshminarayan², Paul Bevis³, Alex Rolls^{4,5}, Michael Jenkins⁴, Peter Holt¹, Ian Loftus¹

¹St George's Vascular Institute, London

²Hull Royal Infirmary, Hull

³North Bristol NHS Trust, Bristol

⁴St Mary's Hospital, London

⁵Fiona Stanley Hospital, Perth, Australia

Poster 7

Technical success and in-hospital mortality of patients after endovascular repair of ruptured abdominal aortic aneurysms: a retrospective study at a specific center in the decade 2012-2022

Georgios Trellopoulos¹, Aikaterini Karamitsou², Stavros Galanis¹, Konstantinos Zapsalis¹, Mohamed Elkawafi²

¹"G.Papanikolaou" General Hospital, Thessaloniki, Greece

²Manchester Royal Infirmary, Manchester

Poster 8

Type II endoleak embolization in a surveillance program for patient with EVAR during 2018-2022 in a specific centre

Stavros Galanis¹, Georgios Trellopoulos¹, Aikaterini Karamitsou², Mohamed Elkawafi²

¹"G.Papanikolaou" General Hospital, Thessaloniki, Greece

²Manchester Royal Infirmary, Manchester

Poster 9

Endovascular procedures in vascular trauma cases from 2020 to 2022 in a specific centre

Stavros Galanis¹, Georgios Trellopoulos¹, Adamantios Tekelidis¹, Aikaterini Karamitsou², Mohamed Elkawafi²

¹"G.Papanikolaou" General Hospital, Thessaloniki, Greece

²Manchester Royal Infirmary, Manchester

Poster 10

Navigating the challenges of saccular aortic arch aneurysms: A multidisciplinary approach

Ali Kordzadeh, Mohammad Hossain, Arvind Singh, Shiva Dindyal, Vijay Gadhvi

Mid & South Essex Hospital Services NHS Foundation Trust, Basildon

Poster 11

Mechanical thrombectomy for treating intermediate high- and high risk-pulmonary embolism: A retrospective cohort study to assess service requirements and potential benefits in the Southwest Scotland Vascular Network Part 1: Evaluating Natural Language Processing as a method of clinical data analysis

Tereza Cillikova¹, Alexander Vesey^{1,2,3}, Maaz Syed^{2,3}

¹University of Glasgow, Glasgow

²Vascular Surgery, Glasgow

³University Hospital Hairmyres, Hairmyres

Poster 12

Audit on vascular closure devices (VCD) use and groin complications following endovascular interventions

Ahmed Youssif, Muhammad Zulfiquar, Ahmed Bayoumy, Haytham Hamid, Emma Scott
Sunderland Royal Hospital, Sunderland

Poster 13

Single centre experience and outcomes of the Artivion E-Tegra stent graft

Yasser Ashoor, Vickna Balarajah, Luke Arwynck, Aishashaheen Hameed, Nora Alhazhari, Subramanian Nachiappan, Neelanjan Das, Akash Prashar, Carl Kotze, Sandeep Bahia
East Kent University Foundation Trust, Canterbury

Poster 14

Outcomes of endovascular treatment of femoropopliteal segment occlusions

Alex Hardman, Hilary White

Somerset NHS Foundation Trust, Taunton

Poster 15

Clinical value of routine duplex ultrasound scan after radio frequency ablation of truncal veins

Muhammad Butt^{1,2}, Muhammad usman Cheema¹

¹Pilgrim Hospital Boston, Boston

²Queen Medical Centre, Nottingham

Poster 16

Mechanical thrombectomy of acute lower limb deep vein thrombosis: a single-centre case series

Ashwin Sivaharan, Tamer El-Sayed, Rana Khalil, John Reicher, Ralph Jackson, Sandip Nandhra
The Northern Vascular Centre, Freeman Hospital, Newcastle University, Newcastle

Poster 17

The feasibility of lumbar magnetic resonance imaging to assess sarcopenia in chronic limb-threatening ischaemia

Kirsten Goves¹, Kelly Parke², Sarah Nduwayo¹, John Houghton^{1,2}, Gerry McCann^{1,2}, Rob Sayers^{1,2}

¹University of Leicester, Leicester

²University Hospitals of Leicester NHS Trust, Leicester

Poster 18

A systematic review and living meta-analysis of amputation risk in patients with Chronic Limb-Threatening Ischaemia based on their wound, ischaemia, and foot infection classification

Segun Lamidi^{1,2}, Max Jones¹, Coral Pepper², Rob Sayers^{1,2}, John Houghton^{1,2}

¹University of Leicester, Leicester

²University Hospitals of Leicester NHS Trust, Leicester

Poster 19

Evaluating cardiovascular risk management and outcomes in diabetics undergoing intervention for chronic limb-threatening ischaemia

Than Dar¹, Penelope PJ Sucharitkul², Nawaz Z Safdar¹, Bethany Bracewell³, Mehak Sood³, Kinshuk Jain³, Patrick A Coughlin¹, Marc A Bailey^{1,3}

¹The Leeds Vascular Institute, Leeds

²North Bristol Trust, Bristol

³School of Medicine, University of Leeds, Leeds

Poster 20

Patients with chronic limb threatening ischaemia (CLTI) have significant risk of major adverse cardiovascular events (MACE) and mortality. Adjunctive pharmacotherapy is key to reducing risk. We evaluated lipid lowering therapy use (LLT) in patients undergoing intervention for CLTI

Than Dar¹, Penelope PJ Sucharitkul², Nawaz Z Safdar¹, Bethany Bracewell³, Mehak Sood³, Kinshuk Jain³, Patrick A Coughlin¹, Marc A Bailey^{1,3}

¹The Leeds Vascular Institute, Leeds

²North Bristol Trust, Bristol

³School of Medicine, University of Leeds, Leeds
